

You are invited to a

Community Conversation

to explore the benefits of linking collected health, medical and educational data, with a particular focus on

Early Childhood Development

What is the value to you and your organisation from the linking and use of this collected data?

Thursday, 27 November 2014

10:00am – 1.30pm

Purpose Participants will:

Gain an understanding of Data Linkage, particularly as undertaken by SA NT DataLink.

Gain a good understanding of how research using linked data can benefit consumers of government services and the wider community.

Learn about the use of linked data in early childhood development research.

Provide input into future Data Linkage activities and areas of possible research that may benefit the community - our health, education and social wellbeing.

Facilitator Stephanie Miller, Executive Director, HCA

Speakers John Lynch, NHMRC Australia Fellow |Professor of Public Health | Director Data Management & Analysis Centre (DMAC), Better Start Child Health & Development Research Group

Andrew Stanley, Director, SA NT DataLink
